

Dance studios: Stop adult, sexual choreography and costumes for children under 12

At an early age, young children are often being taught how to approach relationships and how to approach intimacy in the wrong way. The art of dance should not be used to divert young girls from healthy sexual development. We need to carefully evaluate the cultural choices that entice young children to be viewed as adults. We need to produce healthy boundaries in dance so that little girls are protected relationally. Then, when they experience the beauty of dance, they can move as young children, not as adults. Let's make a difference by signing this petition. Your signature can help us raise awareness and give a voice to end the sexualization of young girls through choreography and costumes.
